

# INDEX.

*Those articles that are marked thus \* have reference to Mr. Babbage's work on Machines and Manufactures, which in this volume is called the "Appendix."*

## A.

Air Power, proposed plan of using, by Mr. Ericsson and Mr. Treadwell, 294  
American Manual Labor, arguments by Daniel Webster, in favor of the Protection of, 15  
American Institute, full account of the articles exhibited at the Sixth Annual Fair, 173 to 182, 285  
— Mr. Kennedy's Address to the members and friends, 229 to 240  
America, Population of, 156  
Ambition, Thoughts on, 137  
Apparatus and Processes, by Dr. Hare, 290  
Arches in Bridges, Reasons why sustained without regard to the true theory of construction, 254  
Architecture, on the Orders of, continued from Vol. I., 6, 94, 148, 263, 319  
— its dependence on Mechanics, 24  
— Questions on, 193  
Astronomy, History of, 34, 78, 188

## B.

Ballingall on Ship Building, 261  
Baths in Steam Engines, proposed plan for, 293  
Beads, Poisonous ones, account of, 152  
Bees, on the Management of, 274  
Bed, Hydrostatic one described—on Dr. Arnott's plan for invalids, 37  
— another, 305  
Bible, studied by men of the greatest talent, 150  
Birkbeck, Dr. George, his Address on laying the first stone of the "London Mechanics' Institution," 2  
Blydenburgh, S., Letter from, on the Facilitating of Useful Improvements, 246  
Bobbin-net Trade in England, Curious Facts respecting, 27  
Books, on, 96  
— on the Production of in ancient times, in manuscript, 186  
— Burman ones, how made, 71  
Brougham, Lord, Anecdote of, 25

## C.

Canfield's Iron Tension Bridge described, 17  
Casks, Henneky's Gange for, when standing, described, 35  
Caoutchouc, or Indian Rubber, its comparative late introduction into England, 33

<p>Carriages, Improvements suggested for propelling, 251 Calculating by Machinery, Tables for, *42 Cement, as made at Algiers, receipt for, 50 — another called "Ranger's Artificial Stone," specification of the patent for, 255 Children in America without the means of instruction, number estimated, 69 Character, Indecision of, 130 — Decision of, 187 Chinese Kalendar for 1833, 190 Cheap Production, Causes of, *47 Chemistry, History of, continued from Vol. I., 3, 74, 198, 238, 247 City Hall Reporter, Review of, 285 Circle, on the Quadrature of, 86, 329 Clock, vocal one described, 24—Animal one, 151—Curious Mechanical one, 227 Cloak, Gum Elastic one, 68 Clothing, importance of attending to in order to preserve health, 89 Cooking by Gas Flame, Mallett's plan described, 241 Combinations among Workmen, evil effects of—also among employers, *63 Connecticut, Statistics of, 150 Combinations against the public, evils of, *69 Cotton, Account of Manufactures of in the United States, 155 Cotton Thread, cost of spinning in Java and in England, 43 Columns, scale for graduating, 114 Columbus and the Egg, account of, 195 Consumption, on the Cure of by Chloride of Lime, 147 Cream, method of obtaining from milk, 69 Cryptography, or Art of Secret Writing, 196 Cuvier, the important services he has rendered to Science, 25 Curves for Arches, on, by J. S. Van De Graaff, 62, 120 Curious Facts and Experiments, 320</p>	<p>Education, in Scotland, beneficial results from, 116, 134 — Machinery of, 91 Egg Oven, Egyptian method of hatching described, 161</p>
<p>D.</p> <p>Dry Rot, Preventive for, 273 Dry Dock, Hydraulic one in New-York city, account of, 1 — a Portable one described, 277 Dredging Machine, new one, account of, 15 Draining Land, Machine used in England, account of, 215</p>	<p>F.</p> <p>Factories on a large scale, Causes and Consequences of, *45—their progress —Hints for Conducting, *46 Fire, Precautions against, 264 Fireman's Defence, (Aldini's,) 125 Flying, how accomplished, 102 Franklin, Benjamin, Mr. Rush's Eulogy on, 39, 96—his Song for Mechanics, 166—Anecdote of, 187—Memoirs of, 298 Fuel, on the Economy of in private dwellings, 279</p>
<p>E.</p> <p>Geneva, Lake of, Water Spout on described, 8 Genius, Infirmities of illustrated by curious facts, 131 Gearing Chain, invented by Mr. Oldham, of Dublin, Ireland, described, 9 Gilt Frames, how to revive, 208 Gold Leaf, how manufactured in England, and value of, *33 Gold Chains, comparative value of in Venice and England, *33 Grain, Machine used for Cutting, 260 Guesney's New System of Philosophy described, 183</p>	<p>G.</p> <p>Hare, Dr., Communication from, 289 Hartmann on Road Making of Timber, 21 Hat Making, method of clearing fur for, 153 Hemp, Labor Saving Machine for Spinning, by Westerman, 118 Human Frame, on the Structure of, 50 Human and Animal Sensation, 103 Hook's Universal Joint, described, 154 Hunt's Patent Stoves described, 217 Hydraulic Dry Dock, account of, 1</p>
<p>F.</p> <p>Education, Reasons of Daniel Webster why it should be generally diffused, 15 — Lancasterian System in Greece, 186</p>	<p>I.</p> <p>Iron, Process of Silvering of described, 2 — Method of giving a Black and Glossy Appearance, 36 — Effects of burying it and Steel in the Earth, 260, 323 — Experiments on American, 67 Iron Tension Bridge, A. Canfield's Plan for one described, 17 Invention, Progress of exemplified, 109 Improvements, delayed, suggested by Professor Rafinesque, 136 Improvements, Useful, on the Advancement of, 246 Internal Improvements, 324, 326 Instinct, Force of exemplified, 8</p>

## INDEX.

Instruction and Amusement blended, 10  
 Inking Machine for Letter Press Printing, (Wood's,) 64  
 Irrigation, Cheap Plan for, 160  
 Jervis' Plan for Railroad Waggon Wheel, 29

K.

Kalendar, Chinese one for 1833, 190  
 Kitchen Range, Pierce's, described, 105  
 Kennedy, J. P., his Address before the friends and members of the American Institute, 228 to 240  
 Knowledge, Advantages of to a Sailor, 25  
 —— Pursuit of under difficulties, 216

L.

Labor, on the Division of, \*34, \*45—Economy of in large manufactories, \*34—suggesting new ideas of Labor Saving Machines, \*35—Benefits of, illustrated by Pin Making, \*36  
 Landscape Drawing, Machine for facilitating, 73  
 Leather, Process for Varnishing, 39  
 Lime, account of, where most plentiful, 71  
 Libraries for Working Men, 245  
 Liberty and Knowledge, go hand in hand, 129  
 Linen, New Process for Cleaning, 158  
 Locomotive Engine, Jervis' Plan, 77  
 —— generally, and Railroads, 156  
 —— Hancock's, 207

M.

Manufactories at Manchester (England) account of, 11—Capabilities of Machinery in increasing—Separate Cost of each Process, \*43—the District in which they should be situated, \*49—Manufacturing too much, evil of, \*50—Inquiries necessary to be made previous to commencing a large one, \*52—Effects of Taxes on, \*73  
 Mahomedans, Curious Method of disseminating their Doctrines, 16  
 Machinery, Hints for Preserving it in Working Order, 16, 161  
 —— on the Duration of, \*61  
 —— the Exportation of, \*77  
 Machine for moving a given weight, with a given power, 97—On Contrivances in Constructing, \*54—Proper Circumstances for the Application of, \*56  
 —— for Cutting Grain, 260  
 Mankind, Equality of, 103  
 Mallett's Plan for Cooking by Gas Flame described, 241  
 Mechanism of Man, on the, 53  
 Man, contrasted with inferior animals, 37  
 Mechanics' Institution in London, Dr. Birkbeck's Address on laying the foundation stone, 2  
 —— New-York one, second report, 285  
 Mechanics, Erroneous Notions respecting, 72  
 —— Instances of their rising to the highest honors, 130  
 —— worthy of support, 135  
 —— Schools for, 153  
 —— Dr. Franklin's Song for, 164  
 —— in China, 329  
 Mental Labor, on the Division of, \*40  
 Mental Excitement, Danger of, 132  
 Meteoric Phenomena, account of, 287  
 Meteorological Record kept in New-York city, 54, 111, 156, 223, 287, 331  
 —— kept at Avoyelle Ferry, Red River, Lou., 56, 168, 224, 322  
 Mexican Historical MSS. description of, by Professor Rafinesque, 126  
 Microscope, Wonders of displayed, 217  
 Mildew on Plants, Notes on, 106  
 Mining in Cornwall, (Eng.) account of, \*47  
 Minerals in Vegetables, 184  
 Mount Auburn Cemetery, account of, 40  
 Motive Power, Suggestions for a new one, 115  
 —— another, 193  
 Motions and Forces, described by Dr. Arnott, 22  
 Mountains, principal ones in the world, their heights enumerated, 19  
 Mudie's Guide to the Observation of Nature, extracts from, 51, 70, 103, 129

N.

Natural Magic, Experiments in described, 13  
 Natural Wonder, 153  
 Newspapers first written in England, 33  
 Necessity and Invention, 216

O.

Omnibus for Common Roads, 207  
 Oil, Method of Pressing in Corfu, 217

P.

Paris, Statistics of, 30  
 Paddle Wheel, New one, 60  
 Patents recently granted in England, 122  
 —— Law of, Report of a Trial at Boston, 329—on the practice of, \*75  
 Perkins on Heating by Hot Water, 60  
 Pin Making described, \*39  
 Philadelphia, Progressive Improvements in, 159  
 Philosopher nonplussed, 184  
 Philosophy, M. Guesney's New System, 193  
 Pipes, Patent Tinned Lead ones, account of, 67, 136  
 Pierce's Kitchen Range, 105  
 Plough, Draining one used in England, account of, 215  
 Poverty, how to endure it, 9  
 Practical Science, National Gallery of in London, account of, 243  
 Printing and Publishing, account of issuing a volume, and its cost, \*43  
 Prony, M., his Mathematical Tables referred to, \*40—their extent, \*41  
 Pump, New Rotary one, description of, 118  
 —— Hot Water one, 121

R.

Railways of Timber, on the Protection of, by J. L. Sullivan, 26  
 —— Metallic ones, description of, 50  
 —— Comparative Value of, and Iron, 84  
 —— Undulating ones, 317, 327—Review of Badnall's Treatise on, 165, 208 to 214, 265 to 273  
 —— Suggestions for an improved one, 227  
 Railroads, generally, and Locomotive Engines, 157  
 Railroads in Europe, 103  
 Railroad Turnouts, plan for, 295  
 Rafinesque's, Professor, Description of Ancient Historical Mexican MSS., 127—on Delayed Improvements, 136  
 Rational Amusement in Iceland, 151  
 Raw Material, value of in France, \*33  
 —in Belgium, Russia, Sweden, and England, \*34  
 Review of Mudie's Guide to the Observation of Nature, 51  
 —— Boucharlart's System of Mechanics, 110  
 —— Dr. Dick on the Diffusion of Useful Knowledge, 163  
 —— Badnall on Undulating Railways, 165  
 —— German Parables, 164  
 —— City Hall Reporter, 285  
 Rifle, in the form of a walking cane, description of, 162  
 Road Making by Timber, Hartmann's Plan, 21  
 —— J. S. Williams' Observations on, 123  
 Roads in England, advantages of good ones, 313, 257  
 Rural Cemetery at Boston, account of, 40  
 Rutter's Discovery for Generating Heat alluded to, 117, 182, 300

S.

Sayings for Farmers and Mechanics, 133  
 Savoy's Patent for Propelling Carriages, 251  
 Science and Learning, 101  
 Sea Serpent Harpoon, account of, 59  
 Silk, Manufacture of at Boston, account of, 193, 215  
 Ship Building, Ballingall's Improvements, 261  
 Skin and Stomach, good results of attending to, 114  
 Slave, where procured in America, 129  
 Smoke from Wood, bad effects of, &c., 293  
 Spontaneous Ignition, account of, 177  
 Spring, Inflammable one at Buffalo, 104  
 Specific Gravity, its meaning, &c., 85  
 Spider, means employed in weaving its web, 129  
 —— Ingenuity of, 195  
 Story, Judge, his Address on opening the Rural Cemetery at Boston, 43  
 Steel, Effects of burying it and from in the Earth, 250, 323  
 Stoves, Hunt's Patent one described, 216  
 Stereotyping, first invented in America, account of, 31  
 Steamer for family use, account of, 49  
 Steam Travelling on Common Roads, 169, 311  
 Steam Pump, for raising water by forming a vacuum in the cylinders, Proposed Plan, 117  
 Steam first used in Navigation by R. Fulton, on the Hudson River, account of, 59  
 Steam, extinguishing fires by, 339  
 Steam Power, New Era of, 305  
 Steamboat plying on the Susquehanna, described, 154  
 —— one with Paddles in the Stern, account of, 208  
 Steamboat Safety Apparatus, Proposed Plans, 12, 30, 225  
 Steam Engine, Apparatus for stopping and setting in motion, 206

<p><b>S</b>team Engine, Specification of David Redmund's Patent for Improvements on, 8</p> <p>— First Application of to a Practical Useful Purpose, 57</p> <p>— First Application of as a Toy, 58</p> <p>— Ancient Greek one, 113</p> <p>— Rotary one at Lansingburgh, N. Y., 121</p> <p>— New Application of, 133</p> <p><b>S</b>ullivan on Railways of Wood, 26</p>	<p><b>U.</b></p> <p>Ugliness of Face, often accompanied with a Humorous Mind, 147</p> <p><b>V.</b></p> <p>Valve Cock, by Dr. Hare, account of, 292</p> <p>Vernier Scale, on the, 96</p> <p><b>W.</b></p> <p>Water Spout on the Lake of Geneva, 8</p> <p>Want of Observation, Anecdote respecting, 70</p> <p>Watering Machines for Gardeners, &amp;c., 160</p> <p>Wonders of the Microscope, 217</p> <p>Writing in Secret, Art of, 196</p> <p>Water, Experiments showing the pressure of 600 feet in the ocean, 68</p>	<p>Water, on the transfer of the level of, 295</p> <p>Wash, Incombustible one, 38</p> <p>Webster, Daniel, extracts from his Speech at Pittsburg, 13</p> <p>Westerman's Labor Saving Machine for Rope Making, 118</p> <p>Wheel for Railroad Waggons, Jervis' Plan, 29</p> <p>— Improvements for Propelling Carriages, 251</p> <p>Wild Nature, on the Study of, 128</p> <p>Wind, on the Power of, 172</p> <p>Winds and Storms, on the proximate causes of, 294</p> <p>Women, as attendants on the sick, their devotedness and affection, 130</p> <p>Wood's Self-Acting Inking Apparatus, described, 64</p>
---	---	--

**T.**

Tar from the Coal Pit, Substitute for Paint, 264

Taxes upon Manufactures, effects of, "71

Trees, on the Ages of, 130
